

General Information

The NDTA European Region workshop takes place every two years. The 2012 workshop „The International Perspective on the Defense Supply Chain“ is a continuation of the 2010 workshop. It further reflects on the themes discussed during the JEADDC Nov 2010 & Dec 2011, and the 2011 NDTA National Forum. Speakers from various European ministries of transportation, experts from the defense sector and industry are invited. The panels will discuss current issues and future challenges on the defense supply chain considering coalition and national perspectives. Civil agencies like the ministries of transportation govern industry and with that impact the cooperation with industry and the defense agencies. We therefore are highly interested in providing a platform for defense/civil authorities and industry to address their mutual challenges.

Program and workshop registration details will be published separately. Hotel reservation information is in the middle sector of this flyer.
