

**Course Title: Supply Chain Risk Data Analytics****Abstract:**

Learn how top companies are using information, not inventory, to assure supply and the tools and processes required to transform risk management into a competitive advantage. This session will discuss how linking deep, multi-tier intelligence to risk data and news events can drive efficiencies in organizations to provide real return on investments in risk management.

**Organization:** Resilinc**Website:** [www.resilinc.com](http://www.resilinc.com)**Instructor(s):** Graeme Dykes

Graeme has 25 years of software technology experience, bringing digital solutions to global corporations. Focused on customer value, he was most recently a Senior Adviser of Customer Strategy at UL, engaged in understanding C-Suite and executive level challenges and providing transformational solutions.
